

BIODREN

The coherent solution to autotransfusion
for post-operative blood salvage

- ⇒ Integrated system for the collection, processing and reinfusion of the patient's own blood.
- ⇒ Dual filtration stage.
- ⇒ Closed system.
- ⇒ Quick set-up and immediate availability of blood.
- ⇒ Specifically designed to minimise purchase and operational costs.

BIODREN offers the best access to the safest blood: the patient own blood. It eliminates risks of adverse events related to transfusion of allogenic blood.

BIODREN is simple to use and does not specifically require any additional equipment. It performs an efficient autotransfusion by recovering all blood components and permits greater flexibility in the use of blood bank supply.
